2. The following is an examiner's statement of reasons for allowance: The examiner could not find fair suggestion in the art for the added limitations to claims 1,2, and 4 with the further characterization of the voltage and the connection to ground via a capacitor for one terminal of the MOS construction type cap. Also, no suggestion for the embodiment in claim 3 with two MOS elements as recited with one end of each MOS being applied with a control voltage that varies within a range whose intermediate value is the V voltage...The direct current circuit of a resistor and capacitor on one terminal of the MOS element as claimed was also not suggested in addition to the a direct current bias voltage(claim5.) These are in addition to all the other claim limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled " Comments on Statement of Reasons for Allowance."
